HAEFELY EMC NAMED WINNER IN PRESTIGIOUS

2011 BEST IN TEST AWARDS COMPETITION FOR COMPLIANCE/ENVIRONMENTAL TEST

Hipotronics, Inc., a Brewster, NY, USA based company and Haefely EMC, a Basel, Switzerland based company both known as manufacturers of high voltage test and measurement equipment, today announced it was named a winner in *Test & Measurement World's* 2011 Best in Test Awards (<http://www.tmworld.com/awards>) for Compliance/environmental test. Haefely EMC was selected as a winner for its ONYX electrostatic discharge simulator.

“Haefely EMC & Hipotronics are honored that Test & Measurement world has chosen the ONYX ESD simulator to be awarded the 2011 Best in Test Award” noted by Ryan Bares, Hipotronics Sales & Marketing Manager. “The ONYX ESD simulator has elevated the design of all EMC products by integrating cutting edge technology while still maintaining a fair market price. Since the ONYX introduction early last year it has gained significant market share and earned many positive reviews from EMC professionals around the world.”

Haefely Technology's ONYX electrostatic discharge simulator is available in 16kV or 30kV versions. It is the most ergonomic 30kV ESD gun without an additional base control unit that can be battery or mains operated. The easy to use touch screen, integrated “SMART-KEY”, ergonomic design, modular RC units, multilingual interface, remote control software, built-in LED light and temperature and humidity display allows for trouble-free use of the ONYX in all types of test sites.

Information and a complete description of the ONYX, can be found at www.haefely-onyx.com or www.haefelyemc.com. For further information on all other Hipotronics equipment, please visit www.hipotronics.com. Hipotronics Inc and Haefely EMC are subsidiaries of the Hubbell Corporation located in Shelton, CT.

Test & Measurement World's annual Best in Test awards, launched in 1991, honor important and innovative new products and services in the electronics test and measurement industry, as well as outstanding industry professionals. The Best in Test program is now in its 21st year and continues the proud tradition of recognizing excellence in the test, measurement, and inspection community.

About Test & Measurement World

Test & Measurement World provides information for engineers involved in electronics test and measurement across various industries, including communications, aerospace and defense, and consumer electronics. The leading magazine and web site for engineers involved in electronics test, measurement, and inspection worldwide, the *Test & Measurement World* network delivers the news headlines and practical information test engineers need to stay ahead of the curve.

About United Business Media Limited

UBM (UBM.L) focuses on two principal activities: worldwide information distribution, targeting and monitoring, and the development and monetization of B2B communities and markets. UBM's businesses inform markets and serve professional commercial communities—from doctors to game developers, from journalists to jewelry traders, from farmers to pharmacists—with integrated events, online, print, and business information products. Our 6,500 staff in more than 30 countries are organized into specialist teams that serve these communities, bringing buyers and sellers together, helping them to do business and their markets to work effectively and efficiently. For more information, go to www.ubm.com.
