

# FOR IMMEDIATE RELEASE

## **New Product Announcement**

**November 1, 2010**

Hipotronics, Inc., a Brewster, NY, USA based company and manufacturer of high voltage test and measurement equipment, announce the launch of a new secondary power restoration unit, the PT-30.

## **New PT-30**

Hipotronics Power Temp Thirty (PT-30) is the first 30kVA secondary power restoration unit introduced to the market. The PT-30 is designed to temporarily restore underground secondary service when one conductor has failed or been damaged and two conductors are operational. Oversized tires and large hand cart allow for easy maneuverability across uneven surfaces. With a built in 150A breaker, voltage indicator lights, and hand held meter outputs, the PT-30 ensures that power is restored quickly and safely.

Information and a complete description of the PT-30 can be found at [www.hipotronics.com](http://www.hipotronics.com) Hipotronics Inc and is a subsidiary of the Hubbell Corporation located in Orange, CT.
